

Cylindrical Metal Fiber Burners

Product Overview

- Mesh material withstands high temperatures and protects metal body from thermal stresses
- Capable of operating in a wide modulation range
- Available with active end-cap design
- Available with optional end-cap insulation

Market Segments

- Residential & commercial water heaters
- Residential & commercial boilers
- Gas absorption heat pump

Technical Specifications

- Combustion type: Premix
- Input range: 35k – 17+ MBtu/h (10k – 5+ MW)
- Size range:
 - Diameter: 1.5" - 25.5" (40-650 mm)
 - Length: up to 78" (2 Meters)
