

# Electronic Controls

## Product Overview

- Portfolio of electronic controls solutions for a wide array of gas heating applications including residential, commercial, ULN, and ignition modules
- Hardware interfaces and software control logic for the following common functions:
  - Sequencing
  - Ignition control
  - Safety functions
  - Inducer control
  - Gas valve control

## Market Segments

- Residential and light commercial furnaces
- Commercial furnaces
- Gas absorption heat pumps

## Technical Specifications

- Detailed specifications available upon request
